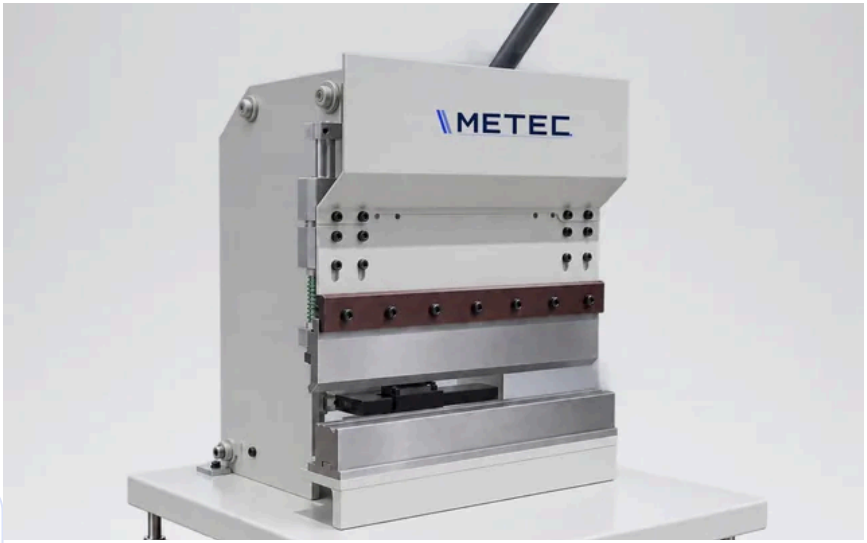
Mini Press

Manual and Hydraulic Press Brake

Compact Press Brakes for Small Parts

Four compact press brakes for short parts, prototypes, small batches and training: two manual machines with a hand lever, one for the workbench and one on its own stand, and two hydraulic machines with a foot pedal for 400 mm and 600 mm parts. A V8 and a V12 lower die come with every machine.



Models	Bending force	Bending length

Mini Press specifications

4 models. Your machine and its accessories are confirmed in the quotation.

Parameter	MP-T400	MP-F400	MP-H400	MP-H600
Version	Tabletop, manual	Floor-standing, manual	Hydraulic	Hydraulic
Bending Capacity (kN)	50–80	50–80	50	50
Bending Length (mm)	400	400	400	600
Operation	Hand lever	Hand lever	Foot pedal	Foot pedal
Bending Cycles (per min)	20–30	20–30	-	-
Lower Die (included)	V8 / V12	V8 / V12	V8 / V12	V8 / V12

What the Mini Press is built for

Manual or Hydraulic

The manual models bend with a hand lever, 20 to 30 bends a minute. The hydraulic models press 5 t when you step on the foot pedal, which leaves both hands free to hold the part.

Bench or Floor

The MP-T400 stands on a workbench. The MP-F400 and both hydraulic models stand on their own cabinet base.

400 or 600 mm

Three models bend parts up to 400 mm long; the MP-H600 takes 600 mm.

Dies Included

Every machine comes with a V8 and a V12 lower die.
